Public Works Commission

- Nearly all of H.B. 153 budget covers debt service on bonds issued under SCIP and Clean Ohio programs
- Remainder pays for operating expenses of Clean Ohio Program
- Development of new information technology platform will continue in FY 2012-FY 2013

OVERVIEW

Agency Overview

The Public Works Commission (PWC) administers the State Capital Improvement Program (SCIP) and the Local Transportation Improvement Program (LTIP). These two programs provide grants and loans to local governments for infrastructure projects. SCIP receives funding from infrastructure bonds and LTIP receives funding from one cent per gallon of the motor vehicle fuel tax. PWC's administrative costs are funded by interest income. In addition to these infrastructure financing programs, PWC also administers a portion of the Clean Ohio Conservation Program (COCP). Currently, the Commission employs a staff of 11.

Appropriation Overview

PWC's programs and operations are funded by a variety of appropriations bills. The main operating budget bill, the focus of this analysis, contains the appropriations for the GRF debt service payments for COCP and SCIP bonds and for the operating expenses of COCP. The appropriations for these programs are summarized in Table 1 below.

Table 1. Appropriations by Fund Group, FY 2012-FY 2013
Am. Sub. H.B. 153

Fund Group	FY 2011*	FY 2012	% change FY 2011-FY 2012	FY 2013	% change FY 2012-FY 2013
General Revenue	\$166,962,408	\$128,723,600	(22.9%)	\$244,868,400	90.2%
Clean Ohio Conservation	\$257,059	\$300,000	16.7%	\$288,980	(3.7%)
TOTAL	\$167,219,468	\$129,023,600	(22.8%)	\$245,157,380	90.0%

*FY 2011 figures represent actual expenditures.

The appropriations for PWC in the main operating appropriations bill, H.B. 153, total \$129.0 million in FY 2012 and \$245.2 million in FY 2013, or \$374.2 million for the biennium. Of this biennial total, nearly all comes from the GRF for debt service payments. The large fluctuation in GRF debt service payments between FY 2011 and appropriations of \$128.7 million in FY 2012 and \$244.9 million in FY 2013 are the result

of the restructuring of certain FY 2012 debt service payments currently scheduled to be paid from the GRF into later biennia. Overall, this initiative lowers the debt service payable from the GRF in FY 2012 by approximately \$440 million in order to fund various state services and repays that debt service from FY 2015 through FY 2025. No debt restructuring is necessary in FY 2013. As noted above, the main operating budget also funds the operating expenses associated with PWC's portion of COCP.

Summary of FY 2012-FY 2013 Budget Issues

Development of New Information Technology Platform

One of PWC's major objectives in the FY 2012-FY 2013 biennium will be to continue the design and development of a new IT platform. The Commission's existing IT infrastructure, which manages large amounts of project and financial data, dates to the early 1990s. Under the FY 2010-FY 2011 budget, PWC contracted with a vendor to perform an assessment of its IT systems. The assessment covered PWC's business processes, analyzed PWC operations and computer systems, and suggested a technical transition plan and roadmap to a future IT platform. Spending for this project in the FY 2010-FY 2011 biennium totaled around \$103,000.

The FY 2012-FY 2013 budget allows PWC to continue working with the consultant to develop and revise the transition plan. Specifically, the consultant will work with PWC to decide on the final project road map and software solution and finalize functional and technical requirements. PWC is also planning on submitting a request for proposals and selecting a vendor to implement the new IT platform during this time. These activities may cost up to \$50,000 per fiscal year. The current timeline proposes implementation of the new system during the FY 2014-FY 2015 biennium. According to PWC, the implementation costs would be funded with the investment income earned on the Commission's various funds.

Continuing Initiatives

In addition to the development of new IT systems, PWC will focus on (1) providing ongoing technical assistance to district integrating committees and local governments, (2) maintaining information systems such as the statewide infrastructure needs database, (3) developing forms and procedures to make the application review and approval process more efficient, and (4) preparing timely and accurate capital disbursement reports produced by the Ohio Administrative Knowledge System (OAKS) to meet the needs of auditors and local government officials.

Summary of PWC Funding Provided in Transportation Budget Bill

H.B. 114, the FY 2012-FY 2013 transportation budget of the 129th General Assembly, appropriated approximately \$57.2 million in each fiscal year for PWC. The majority of H.B. 114 funding is for LTIP, which provides direct grants to counties, cities,

townships, and villages to assist in the costs associated with local road and bridge projects. Grants are allocated to each of PWC's 19 public works district integrating committees on a per capita basis. LTIP receives one cent per gallon of the motor vehicle fuel tax. The bill also provides capital funding of \$150 million for SCIP and \$49 million for the SCIP revolving loan program. The amounts authorized for SCIP fund the program for FY 2012.

The transportation budget also provides funding for the District Administration Program, which authorizes the Director of PWC to use investment earnings from SCIP and LTIP funds for administrative costs incurred by the 19 individual district public works integrating committees (DPWICs). The bill provides that no more than \$1,235,000 per fiscal year will be available for reimbursement and individual districts may not receive more than \$65,000 per fiscal year. This provision has been included in prior transportation budget acts.

ANALYSIS OF ENACTED BUDGET

The following appropriations provide GRF debt service on the bonds issued under the State Capital Improvements Program (SCIP) and the Clean Ohio Conservation Program (COCP). The appropriations also provide for the operating expenses associated with COCP.

Appropriations for PWC				
Fund	ALI and Name		FY 2012	FY 2013
General Revenue Fund				
GRF	150907	State Capital Improvements General Obligation Debt Service	\$106,770,600	\$215,571,100
GRF	150904	Conservation General Obligation Debt Service	\$21,953,000	\$29,297,300
General Revenue Fund Subtotal			\$128,723,600	\$244,868,400
Clean Ohio Conservation Fund Group				
7056	150403	Clean Ohio Operating Expenses	\$300,000	\$288,980
Clean Ohio Conservation Fund Group Subtotal			\$300,000	\$288,980
Total Funding: PWC			\$129,023,600	\$245,157,380

State Capital Improvements General Obligation Debt Service (150907)

This line item pays the debt service on SCIP bonds. Through SCIP, PWC uses infrastructure bond proceeds to provide grants and loans to local governments for improvement of their infrastructure systems. Bond-issuing authority is provided in Section 2p, Article VIII of the Ohio Constitution. Each year approximately \$120 million has been issued to provide the grants and loans. Beginning with program year 25 of SCIP, corresponding to FY 2012, the amount eligible for issuance increases to \$150 million. Eligible projects include improvements to roads, bridges, culverts, water supply systems, wastewater systems, storm water collection systems, and solid waste disposal systems. SCIP has two subprograms, the Small Government Program and the Emergency Assistance Program, under which certain amounts are set aside each fiscal year for villages and townships with less than 5,000 in population and for infrastructure emergencies, respectively.

The budget provides GRF funding of \$106.8 million in FY 2012 and \$215.6 million in FY 2013 for this line item. The large increase in GRF debt service payments between FY 2012 and FY 2013 are the result of the restructuring of certain FY 2012 debt service payments currently scheduled to be paid from the GRF into later biennia. No restructuring is needed for debt service scheduled for payment in FY 2013,

as the budget permits all currently scheduled payments of principal and interest from the GRF to be made in that year.

Conservation General Obligation Debt Service (150904)

This line item pays the debt service on Clean Ohio Conservation bonds. The budget provides GRF funding of \$22.0 million in FY 2012 and \$29.3 million in FY 2013 for this purpose. As with SCIP, the large increase in GRF debt service payments between FY 2012 and FY 2013 are the result of the restructuring of certain FY 2012 debt service payments currently scheduled to be paid from the GRF into later biennia. No restructuring is needed for debt service scheduled for payment in FY 2013.

Clean Ohio Operating Expenses (150403)

This line item funds the operating expenses of COCP, which was created by H.B. 3 of the 124th General Assembly and renewed through the approval of voters in November 2008. PWC's portion of the program provides payments to various property owners to acquire and provide access improvements to open space and enhance riparian corridors. COCP primarily serves local governments and nonprofit organizations, as well as consultants and contractors hired to perform work on approved projects.

COCP grant funding is derived from bond sales of \$50 million per year, of which 75% is used for open space acquisition, 12.5% for agricultural easements (administered by the Department of Agriculture), and 12.5% for recreational trail construction (administered by the Department of Natural Resources). The last capital appropriations for the COCP program were included in H.B. 562 of the 127th General Assembly, the capital appropriations measure for the FY 2009-FY 2010 biennium, as amended by H.B. 2 of the 128th General Assembly.

PWC aligns its budget to reflect the administrative effort necessary to manage its programs. COCP comprises about 20% of all administrative costs incurred by PWC with over 150 projects being managed at any one time. PWC's administrative activities involve reviewing and approving project applications, executing funding agreements, disbursing funds, and providing technical assistance, such as attendance at natural resource council meetings and project monitoring. The budget appropriates \$300,000 in FY 2012 and \$288,980 in FY 2013 for these activities, which are funded by investment income earned on the Clean Ohio Conservation Fund (Fund 7056). Overall, the amounts appropriated will enable the Commission to maintain current operations. Approximately \$257,000 was spent in this line item during FY 2011.
