

# Medicaid expenditures grow more than 85% over past decade

Medicaid Expenditures (in billions), FY 2013 to FY 2022

Source: Ohio Administrative Knowledge System

- Medicaid expenditures have increased more than 85% over the past decade.
  - The state share increased 34% over this time period while the federal increased by 116%.
  - Expenditures are affected by many factors, including economic conditions and health care prices.
- The largest increases in Medicaid expenditures occurred:
  - Between FY 2014 and FY 2016, when coverage for the Group VIII category began.
  - Between FY 2020 and FY 2022, due to increased caseloads and enhanced federal support during the COVID-19 pandemic. Increases during this time period have been primarily federal expenditures.
