

Medicaid expenditures grew more than 65% over past decade

Medicaid Expenditures (in billions), FY 2015 to FY 2024

Source: Ohio Administrative Knowledge System

- Medicaid expenditures have increased more than 65% over the past decade.
 - The state share increased by 62% over this period while the federal share increased by 68%.
 - Expenditures are affected by many factors, including economic conditions and health care prices.
 - The largest increases in Medicaid expenditures occurred between FY 2020 and FY 2022, due to increased caseloads and enhanced federal support during the COVID-19 pandemic. Increases during this period were primarily federal expenditures.
- From FY 2023 to FY 2024, Managed Care expenditures increased by 5.8% (\$1.4 billion), and fee-for-service (including long-term care) expenditures increased by 9.1% (\$830,000), despite caseloads starting to decline in late FY 2023.
