

Ohio landfills received 22.9 million tons of waste in 2025

Waste Received at Ohio Landfills by Type, 2016-2025

Source: Ohio Environmental Protection Agency

- Ohio landfills received 22.9 million tons of waste in 2025, an increase of 0.8 million tons or 3.5% from 2024, and 0.3 million tons or 1.4% below the ten-year average of 23.2 million tons (as measured from 2016 to 2025).
- In 2025, total waste disposed included:
 - Municipal solid waste (residential and commercial): 13.8 million tons (60.2%).
 - Construction and Demolition Debris (C&DD): 5.6 million tons (24.4%).
 - Industrial solid waste: 3.2 million tons (14.0%).
 - Excluded waste: nearly 345,000 tons (1.5%).
- Excluded waste includes materials that are authorized for disposal at a solid waste landfill and excluded from the definition of solid waste such as earth, fly ash, slag, and other substances not harmful to public health.
- As of July 2026, there are 85 landfills in Ohio: 41 C&DD, 37 municipal, 4 industrial, and 3 residual (a subset of industrial).
