GRF Debt Service Payments as a % of Personal Income

Debt Service Ratio: GRF Debt Service Payments as a % of Combined GRF Revenue and Lottery Profits

GRF Debt Service Payments (\$ in millions)

- GRF debt service payment reductions from FY 2009 to FY 2012 were primarily due to debt restructuring and tobacco securitization. The dip in debt service in FY 2021 was the result of another debt restructuring as part of OBM's pandemic response.
- In November 1999, Ohio voters approved Section 17 of Article VIII of the state Constitution that established a 5% "cap" on the amount of GRF-backed debt the state may incur in a given year. That is, the state cannot issue additional GRF-backed debt if total debt service payments in any future year would exceed 5% of the total GRF and net lottery profits revenue in the year of issuance, unless the 5% cap is waived by voters or by a three-fifths vote of both houses.
