Appendix
Ohio Agricultural Statistics, 2018-2019 Annual Bulletin

*This report covers calendar year 2018 in order to align with statistics provided by the USDA.

The Ohio Department of Agriculture provides leadership for Ohio's No. 1 industry – food and agriculture – to create greater economic opportunity for Ohio's farmers and food processors; to preserve and enhance Ohio's bountiful resources; and to partner with Ohio's research institutions to further the development of new agricultural products and services. The department administers numerous regulatory, food safety and consumer protection programs for the benefit of all Ohioans and helps build marketing opportunities for Ohio farmers and food processors.

The department's workload is divided among the following divisions and programs: Administration, Amusement Ride Safety, Animal Health, Consumer Protection Laboratory, Dairy, Enforcement, Farmland Preservation, Food Safety, Livestock Environmental Permitting, Markets, Meat Inspection, Ohio Grape Industries, Plant Health, Soil and Water Conservation and Weights and Measures.

The mission of the Ohio Department of Agriculture is to protect Ohio citizens by ensuring the safety of the state's food supply and the health of Ohio's food animals and plant life, and to create economic opportunities for Ohio's farmers, food processors and agribusinesses.

Message from the Ohio Department of Agriculture Director

August 1, 2019

I am honored to have been nominated by Governor Mike DeWine as the 39th Director of the Ohio Department of Agriculture. These last few months have been exciting and incredibly fast-paced as I get to know more of the team at the department and delve into the issues at hand.

My first order of business was to hold 30 meet and greet sessions that covered all of Ohio's 88 counties, talking about our plans and goals over the next several years, and hearing concerns from those closest to the industry who work in the barns and fields every day. The number one concern raised in these meetings was water quality. I am excited about the governor's H2Ohio plan that will provide the state with the tools and resources necessary to effectively address Ohio's water quality issues.

In addition to our traditional regulatory duties of protecting consumers, assuring plant and animal health, and assuring safe food, we are going to put some additional effort behind important issues. We are going to find innovative ways to bring national attention and growth to our number one industry.

There is an incredible need for young kids to have access to healthy food and to know that their food comes from Ohio and other producers – not just the grocery store. We are incorporating new preschool and elementary farm to school programs through the department. We are still in the planning stages, but we see ourselves as becoming a main coordinator or a "hub" to link Ohio food and ag education to young children.

The department is also undertaking a critical examination of the number of inspectors in each area of the agency and if the need exists for revised training or updated practices to ensure all Ohioans enjoy safe meals and entertainment. Our number one priority is consumer safety, and that includes making sure our divisions are adequately staffed and funded.

As we round out the rest of the summer and the remainder of the year, I will continue to attend as many local events as possible, while continuing to move forward with our priorities and upholding our important roles of safeguarding the food supply, protecting consumers, safeguarding plant and animal health, and supporting rural Ohio. I look forward to serving the people of our great state.

Sincerely,

Dorothy Pelanda
Director

2019 EVENTS

H2Ohio

Everyone in the state should have access to safe, clean water. Governor DeWine has made this a priority and in 2019 he introduced H2Ohio to invest in targeted, long-term solutions for clean and safe water throughout Ohio.

The Ohio Department of Agriculture is working closely with other agencies including the Ohio Department of Natural Resources and Ohio Environmental Protection Agency, to take meaningful action to address water quality needs and support innovative solutions.

Beginning in Fiscal Year 2020, the Ohio Department of Agriculture will implement a multi-faceted, inter-connected approach in the areas of Nutrient Management (reduce nutrient loss from surface applications), Water Management (reduce stormwater runoff) and Soil Conservation (reduce sedimentation from erosion) to best reach all aspects within the agricultural industry.

Funding will also be used to support improvements in and development of new technologies to reduce nutrient loading, and for research and monitoring to track overall progress.

Growing Ohio Magazine

The sixth issue of *Growing Ohio* was distributed in 2019. This magazine is an outreach effort to help educate business representatives, leaders and the general public about the far-reaching importance of agriculture to our state's economy and the daily lives of all Ohioans. This and previous versions of the publication are available on the department's website, agri.ohio.gov.

COSI Science Festival

Ohio Department of Agriculture staff help children understand the science behind agriculture and growing food with hands-on activities - from testing soil to grinding wheat.

The Ohio Department of Agriculture participated in the inaugural COSI Science Festival, May 1-4, 2019. The COSI Science Festival is among the largest science events in Ohio history, and included four days of events at Central Ohio businesses, community centers, libraries, schools, and more. It was a collaboration between COSI, Battelle, NASA, and other Central Ohio STEM leaders to form an unprecedented partnership impacting tens of thousands of people. Ohio Department of Agriculture staff participated and hosted one of the free interactive stations, which taught young participants about the science behind agriculture and growing the foods that they know and enjoy, like the ingredients used to make pizza.

Children's Initiatives

Governor DeWine's agricultural background and focus on children's initiatives is the drive for new preschool and elementary Farm to School programs through the Ohio Department of Agriculture. The goal is to help educate young children about where their food comes from, involving them in the growth of that food, and what it means to fuel the body with healthy food.

Cathy Corbitt, Deputy Director of Children's Initiatives, has been busy working on Farm to School programs. She has learned about other programs that teach children about where their food comes from like this one at Claradale Farms, where children learned about dairy cows and milk.

As part of its Farm to School initiative, ODA also visited New Lexington Elementary with First Lady Fran DeWine. New Lexington has the 2nd largest FFA Chapter in the state and students are able to have hands-on learning at the farm that is shared with Hocking College's Perry Campus. Students at the elementary help with the schools backpack program by filling bags with groceries that go home with students on the weekend.

Helping Farmers in Weather Crisis

Governor Mike DeWine and Director Dorothy Pelanda met with Northwest Ohio farmers about the pending weather conditions that are preventing many farmers from planting their 2019 crops.

Governor Mike DeWine and Ohio Agriculture Director Dorothy Pelanda met with Northwest Ohio farmers in June 2019 to discuss the historical planting struggles from the weather. The above average rainfall flooded fields, hampered the ability to plant crops, and created a livestock feed crisis. Governor DeWine and Director Pelanda saw the situation firsthand at R. J. Swartz & Son Farm in Wood County, then sat down with farmers for a discussion. Prior to this meeting, Governor DeWine sent a letter to USDA Secretary Sonny Perdue requesting a Secretarial disaster designation.

Statewide Meet and Greets

Director Pelanda hosted 30 meet and greet sessions in conjunction with Ohio's Soil and Water Conservation Districts that covered all of Ohio's 88 counties, talking about the department's plans and goals over the next several years, and hearing concerns from those closest to the industry who work in the barns and fields every day. The number one concern raised in these meetings was water quality and how we can all work together to improve our lakes, ponds, streams and rivers.

Director Pelanda talks with farmers and citizens in Bowling Green, Ohio during her meet and greet tour across the state. This was one of many stops during the first few months of 2019.

Protecting plant and animal life

Animal Health and Animal Disease Diagnostic Laboratory

Veterinarians and scientists in the Division of Animal Health help to protect the health and safety of Ohio’s livestock and poultry industries. Animal Health staff members provide quick response in the event of an animal disease outbreak, provide ongoing tests and inspections of livestock to verify the absence of disease and control and eradicate infectious animal diseases in Ohio.

Staff members license and inspect livestock dealers, weighers, renderers, raw rendering collectors, garbage feeders, white-tailed deer farms, commercial dog breeding facilities and dangerous wild animal facilities. Staff members also actively participate in a number of federal cooperative agreements with the U.S. Department of Agriculture’s (USDA) Animal and Plant Health Inspection Service (APHIS) and the Food and Drug Administration (FDA) for national disease control programs including Avian Influenza, Bovine Spongiform Encephalopathy, Chronic Wasting Disease, Exotic Newcastle Disease, Scrapie, and Foreign Animal Diseases. The division also oversees premise and animal identification and tissue drug residues. Animal Health administers the brand registration program and exhibition livestock inspection and fair testing. Division staff members work closely with the Ohio Poultry Association through the Ohio Egg Quality Assurance Program to reduce consumer exposure to Salmonella enteritidis. In 2018, the division performed 50 FDA egg audits including five comprehensive audits and environmental testing. The division also successfully eradicated Brucella canis from high volume dog breeder kennels through the Commercial Dog Breeding program.

The division’s Animal Disease Diagnostic Laboratory (ADDL), provides regulatory testing and diagnostic laboratory tests for veterinarians, livestock producers and agribusinesses within and beyond Ohio. The ADDL provides nationally recognized expertise, state of the art technology and facilities, rapid turn-around time for result reporting and unmatched customer service. It is one of 42 laboratories in the U.S. accredited by the American Association of Veterinary Laboratory Diagnosticians (AAVLD) and the only AAVLD accredited laboratory in the state of Ohio. In 2018 the lab achieved ISO 17025 accreditation for select tests.

The lab is designated as a Tier 1 lab by the USDA National Animal Health Laboratory Network and provides capacity and capabilities for diagnostic testing to respond to emerging and emergency animal disease situations at the state, regional and national level. In 2018 the ADDL was approved by USDA NAHLN to test for African Swine Fever and was selected by USDA to participating in a national African Swine Fever passive surveillance program.

Licenses Issued

Livestock Dealer	267
Renderer.....	10
Collector	106
Garbage Feeder	4
Captive Whitetail Deer	348
Livestock Brands.....	205

ADDL Tests and Services

Avian Serology.....	194,948
Bacteriology	18,853
Histology.....	821
Immunohistochemistry	11,730
Molecular Diagnostics	32,858
Necropsy Investigations	458
Serology.....	117,039
Virology	42,267
Total.....	422,408

Livestock testing and disease prevention is a critical component of the daily duties upheld by Division of Animal Health staff and the Animal Disease Diagnostic Laboratory.

Plant Health

The Plant Health Division is responsible for enforcing many consumer and public protection regulations. Staff members' duties include testing germination of packaged seeds, verifying label statements on feed and fertilizers, regulating plant nursery stock, monitoring the financial stability of grain elevators, registering pesticides, licensing pesticide applicators, investigating pesticide use complaints and working with USDA APHIS and the U.S. Forest Service to control invasive pest species. The division's role is to ensure businesses that produce, process and distribute agricultural products provide safe and properly labeled products to consumers.

The division's Pesticide and Fertilizer Regulation Program regulates the use and distribution of pesticides as well as the manufacturing and distribution of fertilizer, lime and agricultural additives. This section issues licenses to pesticide applicators and serves as the registrar for pesticide and fertilizer companies. Through routine inspections, staff members enforce the state laws and rules that govern these activities. In addition to these responsibilities, staff members conduct inspections for the U.S. Environmental Protection Agency in accordance with a cooperative agreement to ensure compliance with the Federal Insecticide, Fungicide and Rodenticide Act.

In 2018, there were 29,133 licensed pesticide applicators, 15,826 registered pesticide products and 6,039 registered specialty fertilizers in Ohio. Training and testing sessions for certification and re-certification of pesticide applicators were also held during the year, helping to assure the safe use of pesticides and preventing misuse and mishandling.

Pesticide and fertilizer education and inspections help facilitate the correct usage of these two important agricultural additives.

Plant Pest Control

Nursery Inspection Certificates Issued	725
Nursery Dealer Licenses Issued	4,729
Initial Inspection of Nursery	890
Acres Inspected	11,670
Nursery Stock Restrictions Issued.....	7
Dealer Inspections.....	840
Plants Ordered Off Sale	11,313
Nursery Stock Rejections Issued.....	3
Nursery Stock Seizures Issued	3
State Phytosanitary Certificates Issued	104
Federal Phytosanitary Certificates Issued.....	7,288
Compliance Agreements	209
Apiary Registration Certificates Issued	5,696
Apiaries Registered.....	8,937
Estimated Colonies	43,490
County Apiary Inspectors	56
Apiaries Inspected	5,033
Colonies Inspected	21,196

Private Applicator Exams.....	4,521
Commercial Applicator Exams	9,891
Products Registered.....	15,826
Specialty Products Registered	6,039
Routine Inspections	2,165
Ohio Sensitive Crop Registry Users.....	743

Staff members continue to integrate state water quality regulations assigned to the Ohio Department of Agriculture, including soil testing, banning manure and fertilizer application on frozen or saturated ground in the Western Lake Erie Basin and setting parameters for cover crop exemptions and manure storage. The department also continues to train farmers through the Agricultural Fertilizer Applicator Certification Program. Since these trainings began, more than 17,000 farmers have been trained.

The Grain, Feed and Seed Program licenses and regulates commodity handlers in Ohio; helps assure label claims are accurate on all agricultural, vegetable, flower and lawn seeds; and monitors animal feed, including pet food, to make sure claims of protein, fat, vitamins, minerals and antibiotics are accurate.

Licensed grain handlers are required to meet certain net worth requirements, verified by financial statements annually submitted to the department. Licensed handlers are required to have insurance coverage equal to full-market value on all grain in their facilities to protect all or part of their losses in case of fire or other disasters. This section also administers the state Grain Indemnity Fund, which reimburses eligible farmers when a licensed elevator becomes insolvent.

Inspectors examine records and check production facilities for verification that feeds are manufactured properly. They help assure precautions are taken to prevent possible cross-contamination and that feeds are correctly labeled to prevent any prohibited material from being fed to ruminants.

Program staff members work with the U.S. FDA performing inspections to help prevent the occurrence of bovine spongiform encephalopathy.

Ohio's green industry is one of the highest-value segments of the state's agricultural sector. The Plant Pest Control Program helps protect the state's plant nurseries and consumers by performing annual inspections to detect pests that pose a threat to plants. This section enforces federal and state quarantines that restrict the movement of articles capable of harboring destructive pests. It provides inspections and phytosanitary certificates for shipments of grain, seed, logs, lumber, greenhouse plants and other agricultural commodities destined for other states and foreign markets. Plant Pest Control staff members also perform exotic pest surveys for destructive insects and disease. Early detection of these pests can increase the likelihood of control and decrease the negative impact to growers or the environment.

Working closely with USDA-APHIS, the Plant Pest Control section continues to support the efforts to survey, contain and eventually eradicate the Asian longhorned beetle from southwestern Ohio. The Asian longhorned beetle was discovered in Clermont County in June 2011. This invasive beetle poses a threat to Ohio's hardwood forests (more than \$2.5 billion in standing maple lumber) and the state's \$5 billion nursery industry which employs nearly 240,000 people.

Currently there are 57 square miles under quarantine for the Asian longhorned beetle. In 2018, Stonelick/Batavia Township and Monroe Township were declared eradicated from this pest.

Honey bees play a vital role in Ohio agriculture as pollinators of one third of what we eat every day. Honey bees not only provide honey but also play the critical role of pollinating many of the fruit and vegetable crops grown in Ohio, such as apples, peaches, cucumbers and pumpkins. They also pollinate seed crops as well as soybeans, hay and wild plants.

Staff members coordinate state and county apiary inspections to assure a healthy beekeeping industry. Beekeepers are required to register each apiary annually with the Ohio Department of Agriculture so that colonies may be counted and examined for diseases and parasites. In 2018 beekeepers registered 8,937 apiaries and an estimated 43,490 bee colonies.

Beekeepers are required to register each apiary annually with the Ohio Department of Agriculture so that colonies may be counted and examined for diseases and parasites.

The gypsy moth is a non-native insect threatening our hardwood forest and ornamental plants in Ohio. It will feed on more than 300 different species of trees and shrubs, with oak being its preferred host. The Ohio Department of Agriculture's Gypsy Moth Program is part of a national integrated pest management program sponsored by USDA's Forest Service that involves several state agriculture departments along the leading edge of the infestation.

Traps are placed across Ohio to detect, isolate and monitor gypsy moth populations. In 2018, 9,402 traps were placed in 66 counties. Aerial treatment on 31,554 acres was conducted to suppress, slow the spread of, or eradicate, any developing populations.

Aerial treatments disrupt the mating process and slows the spread of the destructive gypsy moth.

Safeguarding the food supply

Consumer Protection Laboratory

The Consumer Protection Laboratory (CPL) is Ohio's premier food and agriculture testing lab and carries out an important component of the department's mission to protect the public. Scientists test food, feed, fertilizers, liming materials, pesticides and animal exhibition and racehorse samples. CPL houses the Analytical Toxicology Lab (ATL) which is the official equine drug testing laboratory for the Ohio State Racing Commission. CPL is the state's primary emergency response lab for biological and chemical terrorism in food and environmental products as a member of USDA's Food Safety and Inspection Services and the FDA sponsored Food Emergency Response Network (FERN).

The CPL staff members help assure the safety of and provide consumer protection for Ohio's food supply, agricultural products, as well as animal competitions and exhibitions. The CPL analyzes samples originating in the food chain - from the farm, through processing and distribution, to the retail level. Microbiologists test dairy products, raw and processed meat products, vegetables, fruits, drinking water and dairy process water for bacteria that cause foodborne illness.

In 2018, CPL and ATL successfully maintained A2LA accreditation for all lab sections. ATL detected new prohibited drugs which were not reported before in race horse samples and successfully performed method validations resulting into lower the detection limits and improved instrument run times. The General Chemistry lab validated a new LC-MS method for testing Patulin in apple cider and revised the fair exhibition testing protocols to provide streamlining of samples received from the county fairs. The Microbiology Lab developed methods for analyzing animal feed for GMO. The lab also isolated pathogens from pet food samples as part of FDA FERN surveillance project which led to a large-scale nationwide recall. The Pesticide Laboratory streamlined a number of testing methods and acquired a new technology which helps make both Pesticide Data Program and Federal Fungicide Insecticide and Rodenticide Act methods more efficient.

Lab Sections	Tests Reported
Microbiology	23,311
General Chemistry.....	15,848
Pesticides	22,852
Analytical Toxicology.....	32,739
USDA Pesticide Data Program	167,088
FERN (FDA and USDA) Chemistry	5,324
FERN (FDA and USDA) Microbiology	584
Total	267,746

Dairy

Ohio's Division of Dairy helps assure that dairy products produced, transported and processed in Ohio are wholesome and safe for consumers. The division's registered sanitarians work daily across the state to provide critical services through a series of inspections, evaluations and sampling of raw and pasteurized milk products. Ohio's dairy farmers and processors reach millions of consumers each year with a wide variety of products, including milk, powdered milk, cheese, butter, cottage cheese, sour cream, yogurt and frozen desserts.

Ohio's Dairy Division has two core missions. The first is to mandate, foster and promote the wholesomeness and safety of milk products. The second is to enable milk and dairy products to flow freely into interstate commerce.

The Dairy Division's registered sanitarian's work includes inspections, evaluations and sampling of raw and pasteurized milk products. These services are authorized and directed through an FDA cooperative agreement and mandated through state law and the Pasteurized Milk Ordinance of which the State of Ohio is in substantial compliance and in good standing. Ohio is recognized as a top-tier national program.

During 2018, sanitarians and supervisors attended FDA training relative to FSMA (Food Safety Modernization Act). This puts Ohio in a stronger position relative to education, training and inspectional duties. Ohio's processors continue to increase and expand operations. Many new operations have been licensed in 2018 and expansions of existing facilities continue. Ohio is home to the nation's largest yogurt production plant and is the #1 Swiss cheese manufacturing state.

Producer efficiency has been headlined by the use of technology, such as robotic milkers. Ohio continues to see an increase in the purchase and use of robotics. Presently Ohio has 55 farms and 180 automated milkers. Ohio's Dairy Division has nationally recognized expertise to bring them online in a timely manner.

Inspections

Producers	6,943
Processors	510
Tanker Trucks	329
Weigher, Sampler, Tester	554
Grade A BTU Survey	79
Grade A Plant Survey	19
Single Service Listing	38
Pasteurized Equipment Tests	580

Licenses

Producer	2,045
Processor	159
Receiving, Transfer, Wash Stations	15
Haulers	103
Weigher, Sampler, Tester	1,069

Food Safety

The Division of Food Safety helps assure consumers are provided foods, over-the-counter drugs, dietary supplements and cosmetics that are safe, unadulterated and honestly presented. Division staff members work toward this goal through regulatory oversight of the wholesale and retail industry and through contracts, partnerships and educational activities with federal, state and local food regulatory agencies.

Division of Food Safety inspectors inspect wholesale operations, such as bakeries, canneries, snack food and candy manufacturers, water and soft drink bottlers, seafood processors and food warehouses. Staff members who inspect wholesale operations also perform contract inspections for FDA and conduct weekly sampling for the USDA's Pesticide Data Program.

In 2018, division staff continued work to help farmers comply with the federal produce safety rule through trainings, education and communication. The division conducted 14 Produce Safety Alliance courses in 2018.

Division staff worked with the industry through training and outreach to educate them on the new federal preventive control, which will ultimately improve food safety for consumers. The division conducted three Preventive Control Alliance courses in 2018.

Licenses

Wholesale and Processing.....	4,027
Home Bakery Registrations	836
Retail Licenses (issued by local Health Departments)	18,432

Inspections, Certifications and Collections

Wholesale/Processing Inspections.....	4,212
ODA/FDA Contract Inspections	425
Farm Market and Farmers' Market Inspections	33
Samples Collected	922
Variance Review Inspection.....	21
Country of Origin Labeling Audits (COOL)	77

In 2018, food safety staff continued surveillance sampling at retail grocery stores, in which 922 samples were collected and analyzed. One sample tested positive for *Listeria Monocytogenes* which resulted in a warning being issued by the processing firm.

Meat Inspection

The Ohio Meat and Poultry Inspection program operated by the Division of Meat Inspection is the third largest state program in the country. It not only maintains the predominant intrastate component, but also holds a Cooperative Interstate Shipment agreement with USDA to provide an opportunity for selected establishments to produce products for interstate commerce. The mission of the division is to operate as a public health regulatory agency to protect consumers by ensuring licensed facilities produce meat and poultry products that are safe, wholesome and truthfully labeled in a sanitary environment.

The division conducts inspection visits to all 182 fully inspected establishments. Inspectors are present at these facilities each day of slaughter or processing to verify implemented food safety systems. These food safety systems must meet Sanitation Performance Standards, Sanitation Standard Operating Procedures and Hazard Analysis Critical Control Point regulatory requirements to permit applying the mark of inspection to their products for sale in commerce. An additional 76 custom establishments are visited once every 2-4 weeks to verify implementation of the custom exempt regulatory requirements to permit the ability to provide a service to livestock owners producing not for sale products for personal use.

The Ohio Cooperative Interstate Shipment Program continues to grow as the Division of Meat Inspection remains diligent in fulfilling the departments mission of creating economic opportunities for food processors in the state. At the end of 2018, there were 19 establishments participating in the program, which is more than any other state in the country.

During 2018, ODA Meat Inspectors conducted 167,032 inspection procedures, collected 3,753 product and environmental samples, and the labeling office reviewed 1,203 new product labels. All of this is done to protect public health by ensuring that meat and poultry products produced at licensed establishments are safe, wholesome, and truthfully labeled.

Protecting consumers

Amusement Ride Safety

Under Ohio law, all amusement rides must be inspected and licensed before operating to verify that they are assembled, maintained and operated to manufacturer’s specifications and recommendations. Along with the initial inspection, Amusement Ride Safety inspectors will conduct supplemental and midseason operational inspections on amusement rides. The inspectors evaluate everything from the structural integrity, safety systems and signage to general ride operations.

Amusement rides inspected under Ohio law include mechanical rides, roller coasters, go-karts, water rides at water parks and inflatable devices. In addition to amusement ride inspections, inspectors ensure that midway games of skill and side shows operating at all 94 county and independent agricultural fairs and the Ohio State Fair are skillful and properly operated. Annually, more than 7,000 concession inspections are conducted during these fairs.

Ohio is known for the quality and quantity of its amusement rides. The state is also known for having one of the most robust ride safety programs in the country. Inspectors annually attend safety seminars sponsored by the Amusement Industries Manufacturers and Suppliers and the National Association of Amusement Ride Safety Officials. Training includes structural integrity, non-destructive testing, electrical safety, hydraulic systems, braking systems, vehicle harnesses and lap restraints, general signage and ride operations. Additionally, division employees are heavily involved with and sit on numerous committees of national organizations as the industry continually moves forward on potential improvements to amusement ride safety standards.

Licenses

Permanent Parks/Facilities	137
Go-Kart Facilities.....	35
Portable Ride Companies	351
Rides Licensed	3,947

Amusement Ride Safety inspectors verify all rides are assembled, maintained, and operated according to manufacturer’s specifications.

Enforcement

The Enforcement Division provides support for the Ohio Department of Agriculture’s regulatory divisions in gaining compliance with Ohio’s agricultural laws and regulations. If a business or a person regulated by the department fails to abide by state laws and regulations, the Enforcement Division steps in to take appropriate action. This may be in the form of notices of violations, letters of warning, administrative action and/or criminal prosecutions. In calendar year 2018, the Enforcement Division conducted 178 investigations.

The Auctioneer Program is administered by the Enforcement Division, which licensed 3,102 active auctioneers in 2018.

In 2018, division staff continued to uphold its agreement with the Ohio Veterinary Medical Licensing Board (OVMLB) which authorizes the department to conduct investigations into complaints against its licensees in Ohio as well compliance inspections of veterinary facilities. The division conducted 6 investigations and 108 compliance inspections of veterinary facilities.

The enforcement chief participates with the Department of Homeland Security with regard to biosecurity as it relates to the agriculture industry, along with the department’s food safety and animal health divisions.

Weights and Measures

The Division of Weights and Measures helps to ensure consumer confidence and equity in the marketplace by administering and enforcing all laws pertaining to true and uniform weights and measures standards. The division works with county and city weights and measures programs to test devices ranging from fuel meters and retail store scanners to vehicle and livestock scales for consistent measuring standards.

Ohio law designates the Director of the Ohio Department of Agriculture as the “State Sealer” of weights and measures. The Metrology Laboratory houses the state standards of mass, length and volume. Ohio’s Metrology Lab was honored when it received accreditation certificates to the International Standards Organization (ISO) 17025 laboratory standard and successfully underwent an onsite assessment by NVLAP to continue that level of accreditation. This lab is one of only 14 state measurement laboratories in the U.S. to achieve this level of accreditation. The accreditation insures necessary traceability for Ohio manufacturers and other businesses using these services.

Ohio boasts one of only four National Type Evaluation Program (NTEP) Laboratories in the nation that test and evaluate new scale designs and technology keeping Ohio on the cutting edge of today’s technology. The Ohio lab is also authorized by Canada to test for compliance to Canada’s standards and is one of only two state labs in the nation authorized to test scales for compliance to international standards. It is also the only lab authorized to test multi-dimensional devices in the United States. National statistics released in 2018 show Ohio’s NTEP laboratory continues to be one the busiest and most productive in the U.S. This laboratory was chosen as a trainer for new NTEP Technicians and will be providing them training in 2019.

Training more than 142 county and city weights and measures inspectors and keeping them up to date on new technology used in today’s gas pumps and supermarket scales is a huge task. The National Conference on Weights and Measures made significant changes to the testing procedure for scales. In 2018, department staff provided training regarding these significant issues and other Ohio laws to the state’s 90 local weights and measures offices and all inspectors. Training was also conducted for 358 of Ohio’s 608 active registered service people representing 81 different scale and meter service companies. This is done to promote uniform inspecting and testing procedures throughout the State and per section 1327.502 of the Ohio Revised Code.

Ohio’s testing will continue to increase as the department added two new scale trucks at the end of 2018.

Inspections/Tests	
Vehicle & Livestock Scales	1,130
Law Enforcement Scales	15,731
LP Gas Meters	522
Bulk & Vehicle Tank Meters	1,297
Device Permits Issued	7,057
Packages	
No. Audited	92
No. Lots Tested	1,002
No. Packages Represented in Lots ..	48,209
No. Packages Ordered Off Sale	3,264
Physical Standards	
Tested	15,731
Adjusted	1,263
Companies/Agencies Served	503
Condemned	49

Evaluations Completed	77
Number of Companies Represented	62

Accurate weights and measures are important to fair and accurate commerce. Upholding these standards protects businesses and consumers, ensuring common transactions such as a pound of meat is actually a pound and a gallon of gas is no more or less than an actual gallon.

Conserving resources

Livestock Environmental Permitting

Ohio's Division of Livestock Environmental Permitting regulates Ohio's largest livestock and poultry farms. These Concentrated Animal Feeding Facilities are required to obtain Permits to Install before constructing additional livestock housing or manure storage and handling facilities. The Permits to Install require thorough geological explorations, setbacks and siting criteria, designs meeting engineering standards for manure storage and meeting construction requirements. They must also obtain five year renewable Permits to Operate covering the daily management and operation of those facilities.

DLEP continued the process of reviewing and implementing the requirements set forth in rule and statute for Concentrated Animal Feeding Facilities by reviewing and issuing nine Permits to Install and Permits to Operate for new or expanding facilities. In addition, approximately 49 Permits To Operate renewals were issued to existing concentrated animal feeding facilities. The Division also held our annual Certified Livestock Manager training, with 108 individuals participating over the two-day event.

In 2018, 26 new Certified Livestock Manager certifications and 36 renewal certifications were issued. To evaluate and ensure compliance, more than 450 inspections/investigations were completed by staff inspectors on either permitted farms or of Certified Livestock Managers.

Soil and Water Conservation

The Division of Soil and Water Conservation works closely with Ohio's local soil and water conservation districts (SWCDs) to improve water quality through agricultural best management practices.

The Division of Soil and Water Conservation continues to intensify enforcement of agricultural pollution of violations in the state of Ohio. Division staff work with local SWCDs to investigate complaints and enforce Ohio laws and standards.

In 2018, 17 SWCDs submitted proposals for the Watershed Grant Program which provides up to \$40,000 annually for a three-year grant term. Grant funds support new and existing SWCD staff dedicated to completing specific activities which accelerate implementation of water quality improvement projects. Six SWCDs were selected to receive the grant funds. SWCD watershed staff works with local stakeholders to develop detailed watershed project plans to acquire funding for implementation. Staff works closely with selected SWCDs to implement the management measures addressed in the grant application.

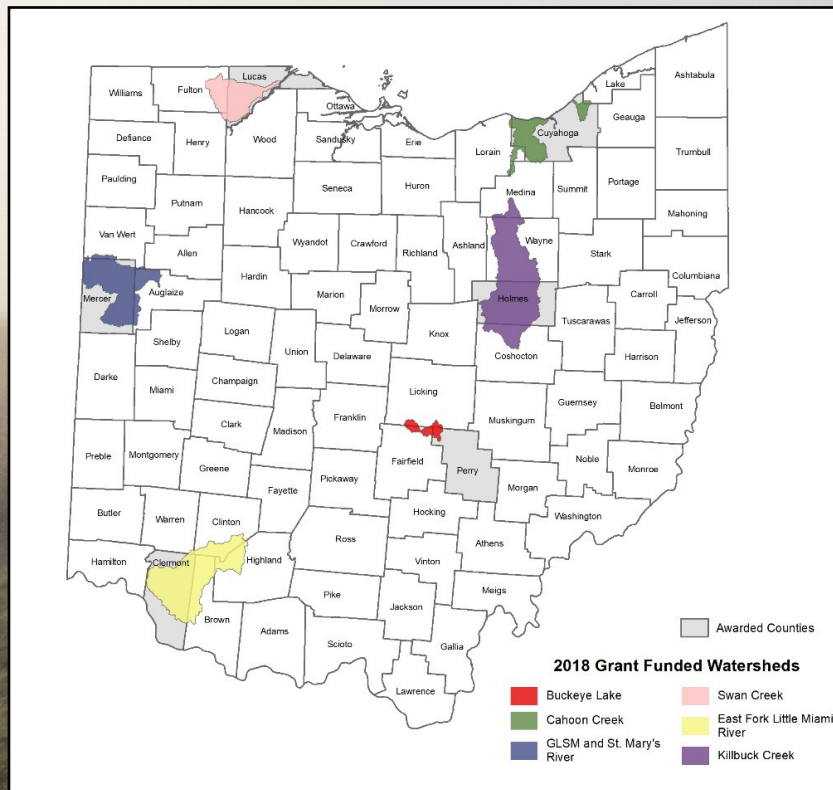

Signed in 2018, Ohio Senate Bill 299 provided \$23.5 million for soil and water conservation districts located in the Western Lake Erie Basin for nutrient management programs. The division distributed \$3.5 million to the 24 districts in the basin for technical assistance.

Three new assistance programs for producers will help to reduce nutrient loss from fields and improve water quality.

The first is the Ohio Working Lands Buffer program, which will encourage producers to establish year around vegetative cover on eligible crop land. The second is the Nutrient Management Plan Development program. This program will be a partnership with the Ohio Agribusiness Association, in which producers are reimbursed for soil testing and nutrient management plans. This would help to ensure the 4R principles are put into place. The third

is the Ohio Working Lands Small Grains Program which is a voluntary program that will encourage producers to plant small grains such as wheat, barley, oats or cereal rye on eligible cropland. As the "Working Lands" name implies, participants must plant and harvest small grains, land apply manure, and plant a cover crop to receive a cost-share payment to help offset operating costs. The program benefits the planting of small grains, not only for the conservation benefits, but also to provide livestock producers with a longer application window to land apply manure and nutrients.

Supporting rural Ohio

Ohio Historic Family Farms

In 2018, the Ohio Department of Agriculture recognized 131 new century, sesquicentennial or bicentennial farms owned by the same family for at least 100, 150 or 200 consecutive years. Nearly 1,700 farms are now registered across the state in the Ohio Historic Family Farms program.

Each family received a certificate signed by the governor and director of agriculture to keep with their historic documents and pass down to future generations.

The Ohio Historic Family Farms program is a voluntary program administered by the Ohio Department of Agriculture. Since 1993, the department has recognized families who have owned their farms for at least 100 years.

Farmland Preservation

The Office of Farmland Preservation strengthens the base of the state’s top industry, food and agriculture, by purchasing permanent agricultural easements from landowners. The agricultural productivity of our state is dependent on the land available for farming. Recognizing this fundamental relationship, the department works to maintain the state’s agricultural heritage, which provides food and jobs. The Farmland Preservation Office works with local partners in 60 counties across the state to help preserve close to 75,000 agricultural acres.

In June 2018, the Ohio Farmland Preservation Advisory Board recommended and affirmed the selection of easements to be purchased under the sixth Local Agricultural Easement Purchase Program funding round. Based on their experience and other factors, 23 certified local partner organizations received a total allocation of \$8.6 million.

Since the beginning of the Clean Ohio purchase program in 2002, the Office of Farmland Preservation has received thousands of applications, and with available funding, preserved 379 of those farms, totaling more than 64,000 acres. In addition, easements have been donated on 64 farms totaling 7,400 acres. Including tobacco easements, Ohioans have permanently set aside 74,585 acres for agricultural production.

Preserved Farmland 2001-2018

	No. of Farms	Acres
Clean Ohio Ag Easement Purchase Program	379	64,236
Ag Easement Donation Program	64	7,407
Tobacco Ag Easement Purchase Program	14	2,942
Total	457	74,585
Agricultural Security Areas	24	19,294

Markets

When consumers buy Ohio-grown, raised or processed products, they help support local farmers and economies and the state's multi-billion dollar food and agriculture industry.

The Markets Division provides marketing services to Ohio's food and agricultural sectors to help retain and create jobs and enhance their competitive advantage in Ohio and the United States.

The Ohio Proud program is the Ohio Department of Agriculture's signature marketing program that promotes food and agricultural products that are made and grown in Ohio. The program's mission is to create and retain jobs by marketing Ohio's food and agricultural industries while increasing in-state sales of Ohio agricultural products. Companies pay a \$50 annual membership fee which licenses them to use the Ohio Proud logo in their marketing efforts. Ohio Proud focuses on three marketing initiatives: Consumer Promotion, Marketing Services and New Market Access & Development.

Ohio Grape Industries

The Ohio Grape Industries Committee oversees marketing, production and research funds for producers of grapes and/or grape products across the state. In accordance with state law, the director of the Ohio Department of Agriculture or a designee serves as chair of the nine-member committee, whose activities are funded from a portion of the excise tax on the sale of wine in Ohio.

The program serves as the marketing and promotional advocate of Ohio's grape industry. The program also supports grape growers by funding extension, production and research programs focusing on viticulture (grape growing), enology (winemaking), entomology, plant pathology, virology and science of weeds.

In 2017, the committee commissioned a new grape and wine economic impact study which identified the full economic impact of Ohio's grape and wine industry as a \$1.3 billion industry.

Additionally, the committee worked with Ohio's 265 wineries to promote Ohio wines to consumers through the Ohio Wines VIP program and to align the industry in a statewide re-branding campaign to help consumers easily identify Ohio as a major wine producing state.

The committee worked with Great Lakes Publishing to publish the sixth annual edition of SIP magazine, with more than 160,000 copies being distributed to consumers statewide through partnerships with Ohio's Turnpike, travel information centers and local convention and visitor's bureaus, as well as the state's wineries.

The committee also allocated more than \$400,000 to provide critical extension and research services, such as how to mitigate winter damage in the vineyard and how to reduce dissolved oxygen levels in wine, to the state's winemakers and grape growers.

August 2019

The US Department of Agriculture's (USDA) National Agricultural Statistics Service's (NASS) – Ohio Field Office is pleased to present the 2018 - 2019 edition of *Ohio Agricultural Statistics Annual Bulletin*. This publication, which is also available on our web site, is a compilation of the many statistical reports published over the past year that highlight Ohio's diverse agriculture sector.

The statistics in this bulletin showcase this diversity and are used on a regular basis to make informed decisions by producers, consultants, advisors, government officials, and others. The compilation of this bulletin is a product of the partnership between the Ohio Department of Agriculture and NASS.

I would like to extend a special thanks to all those producers, agri-businesses, commodity groups, and countless others who have given their valuable time to provide the information that serve as a basis for these data. Their responses are through the Internet, mail, via telephone, and face-to-face interviews.

Special thanks also go to the National Association of State Department of Agriculture enumerators for their outstanding work in collecting and providing timely and accurate data. Without their dedication to Ohio agriculture, we would be unable to successfully provide these many data.

The Census of Agriculture is conducted by NASS every 5 years. The 2017 Census of Agriculture was released in April 2019. Results include information on farm numbers, acreage, crops, livestock, income, expenses, and demographics at the county, state, and national level. The wide-array of Census data are used by policy makers, universities, communities, and organizations throughout Ohio and the United States to plan for the future and compete for valuable resources. We thank Ohio's producers for their cooperation and providing the information which helps ensure the success of Ohio agriculture.

Good decisions can only be made with good information. Our agency continually strives to meet our mission of providing timely, accurate, and useful statistics in service to U.S. agriculture. Thanks again to all those who provided, collected, and analyzed the data in this publication. If you have any questions about these data or need any additional information, please visit our web site at www.nass.usda.gov and/or contact our office at (614) 728-2100. We look forward to serving you.

Sincerely,

Cheryl Turner
State Statistician
USDA, NASS, Great Lakes Region, Ohio

August 1, 2019

I am proud to jointly issue the Ohio Agricultural Statistics 2018-2019 Annual Bulletin. This annual publication is a cooperative effort between the Ohio Department of Agriculture and the United States Department of Agriculture, National Agricultural Statistics Service, Ohio Field Office.

The information contained in this publication is of vital importance and helps us maintain the integrity of this critical industry. From helping local, state and federal leaders understand agriculture's reach, to making appropriate decisions, to helping us carry out one of our important missions of educating the public about the diversity and scope of Ohio's food and agriculture industry, this publication goes a long way toward quantifying the value of Ohio agriculture.

I hope you find this information valuable. On behalf of the Ohio Department of Agriculture, thank you for all that you do to support Ohio's thriving agriculture industry.

Sincerely,

Dorothy Pelanda
Director

Serving Farmers and Protecting Consumers Since 1846

General

Historical Crop Data — Ohio.....	10
Record Highs and Lows: Harvested Acres, Yield, and Production — Ohio.....	11
Cash Rents, State Average — Ohio: 2014-2018.....	11
Farm Real Estate Value — Ohio: 2014-2018	11
Rank and Quantity Produced, Selected Commodities — Ohio, Leading State, and United States: 2018	12
Number of Farms, Land in Farms and Average Farm Size — Ohio and United States: 2014-2018	13
Grain Storage Capacity by Position and Off-Farm Facilities — Ohio: December 1, 2014-2018.....	13
Crops: Monthly Prices Received by Farmers — Ohio: 2017-2018 Marketing Year	13
Crops: Monthly Percent of Crop Marketed — Ohio: 2016-2018 Marketing Years.....	13

Field Crops

Corn for Grain Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018	14
Corn for Silage Area Harvested, Yield, and Production — Ohio: 2014-2018.....	15
Corn Stocks by Position and Month — Ohio: 2014-2018	15
Soybeans for Beans Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018	16
Soybean Stocks by Position and Month — Ohio: 2014-2018.....	17
Winter Wheat Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018	18
Oat Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018	19
All Tobacco Area Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018.....	19
Fall Potato Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018	19
Maple Syrup Taps, Yield, and Production — Ohio: 2014-2018.....	19
Alfalfa Hay Area Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018.....	20
Other Hay Area Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018.....	20
Forage Area Harvested, Yield, and Production — Ohio: 2014-2018	20
Days Suitable for Fieldwork — Ohio: 2017-2018	21
Winter Wheat Development by Selected Dates – Ohio: 2017-2018 and 2013-2017 Average	22
Oats Development by Selected Dates — Ohio: 2017-2018 and 2013-2017 Average.....	22
Soybean Development by Selected Dates — Ohio: 2017-2018 and 2013-2017 Average	23
Soybean Development by Selected Dates — Ohio: 2017-2018 and 2013-2017 Average	23
Corn Development by Selected Dates — Ohio: 2017-2018 and 2013-2017 Average	24
Corn Development by Selected Dates — Ohio: 2017-2018 and 2013-2017 Average	24
Alfalfa Hay Development by Selected Dates — Ohio: 2017-2018	25
Other Hay Development by Selected Dates — Ohio: 2017-2018.....	25

Vegetables

Vegetables: Area Planted and Harvested, Yield, Production, Price, and Value, by Crop – Ohio: 2016-2018	26
Cabbage for Fresh Market Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018	26
Cucumbers for Pickles Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018	26
Bell Peppers for Fresh Market and Processing Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018	27
Pumpkins for Fresh Market and Processing Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018	27

Squash for Fresh Market and Processing Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018.....	27
Sweet Corn for Fresh Market Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018.....	28
Tomatoes for Fresh Market Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018.....	28
Tomatoes for Processing Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018.....	28

Fruit

Apple Acreage, Yield, Production, Price and Value — Ohio: 2014-2018.....	29
Apple Production, Price and Value by Utilization — Ohio: 2014-2018.....	29
Strawberries for Fresh Market and Processing Area Planted and Harvested, Yield, Production, Price, and Value — Ohio: 2014-2018.....	29
Grape Acreage, Yield, Production, Use and Value — Ohio: 2014-2018.....	30
Grape Production, Price and Value by Utilization — Ohio: 2014-2018.....	30
Peach Acreage, Yield, Production, Price and Value — Ohio: 2014-2018.....	30

Livestock

All Cattle and Calves Production and Income — Ohio: 2014-2018.....	31
Commercial Cattle Slaughter — Ohio: Monthly 2017-2018.....	31
Cattle and Calves: Number by Class and Calf Crop — Ohio and United States: January 1, 2014-2018.....	32
Milk Production and Disposition — Ohio and United States: 2014-2018.....	32
Milk Cows and Production by Month — Ohio: 2014-2018.....	33
Dairy Products: Annual Production Totals — Ohio: 2014-2018.....	34
Honey: Number of Colonies, Yield, Production, Stocks, Price, and Value — Ohio: 2014-2018.....	34
Commercial Hog Slaughter — Ohio: Monthly 2017-2018.....	34
Hogs and Pigs: Production, Marketings and Income — Ohio: 2014-2018.....	35
Market Hogs and Pigs Inventory by Weight Group — Ohio and United States: December 1, 2014-2018.....	35
Hogs and Pigs Total, Breeding and Market Inventory, Farrowings, Pigs per Litter, Pig Crop, and Marketings — Ohio and United States: December 1, 2014-2018.....	35
Commercial Sheep and Lamb Slaughter — Ohio: Monthly 2017-2018.....	36
Sheep and Lamb: Lamb Crop, Farm Slaughter and Death Loss — Ohio: 2014-2018.....	36
Market Sheep and Lamb Inventory by Weight Group — Ohio: January 1, 2014-2018.....	36
Sheep and Lamb Inventory by Class — Ohio and United States: January 1, 2014-2018.....	37
Wool Production, Price and Value — Ohio: 2014-2018.....	37
Turkey Production and Value — Ohio and United States: 2014-2018.....	37
Egg Production and Value — Ohio and United States: 2014-2018.....	38
Chicken Disposition and Value — Ohio and United States: 2014-2018.....	38
Chicken Inventory by Class— Ohio and United States: December 1, 2014-2018.....	38
Young Chickens, Number Slaughtered, Total Live Weight, and Average Live Weight — Ohio: Monthly 2017-2018.....	39
Broiler Production and Value — Ohio: 2014-2018.....	39
Average Number of Layers on Hand and Eggs Produced by Months — Ohio: 2014-2018.....	40

Honey: Number of Colonies, Yield, Production, Stocks, Price, and Value — Ohio: 2014-2018

[Producers with 5 or more colonies.]

Year	Honey producing colonies ¹	Yield per colony	Production	Stocks December 15 ²	Average price per pound ³	Value of production ⁴
	(1,000)	(pounds)	(1,000 pounds)	(1,000 pounds)	(cents)	(1,000 dollars)
2014	15	61	915	256	358	3,276
2015	17	50	850	357	360	3,060
2016	15	79	1,185	664	393	4,657
2017	15	73	1,095	657	324	3,548
2018	14	73	1,022	491	361	3,689

¹ Honey producing colonies are the maximum number of colonies from which honey was taken during the year. It is possible to take honey from colonies which did not survive the entire year.

² Stocks held by producers.

³ Average price per pound based on expanded sales.

⁴ Value of production is equal to production multiplied by average price per pound.
