Human sample testing is performed by Alere Toxicology.

In 2019, the racing commission tested 20,012 blood and urine samples collected from horses that raced at seven commercial tracks and 59 county fairs. Analyses of these samples resulted in 141 positive findings.

A total of 115 human samples were analyzed and 25 positive findings were discovered.

## Ohio State Racing Commission Members Past and Present

The commission was created in 1933 after legislation passed by the Ohio General Assembly permitted pari-mutuel wagering on horse racing in Ohio for the first time. The commission currently employs six individuals at its Columbus headquarters and contracts with nine people to provide services as presiding judges, state stewards and state veterinarians. Also, five racing inspectors and two investigators license individuals at Ohio's commercial racetracks and at county fairs where wagering takes place. Below are individuals that have served as racing commission members since 1933.
